*Yours or RI supplied
Type & Serial #*

BARREL: _____
*Length/Contour
Muzzlebrake/Cap*

METAL FINISH: _____
Cerakote Color

STOCK FINISH: _____

STOCK L.O.P.: _____

The barrel length and contour are determined by Model/Caliber you choose and what you wish the final weight of the bare rifle to be. Once we know caliber/Model and weight preference we can suggest barrel length and contour so that the rifle has proper balance. Barrel length is also plus muzzlebrake. A 23" bbl plus the brake is 24".

Stock L.O.P. - Length of Pull. Most factory rifles are 13 1/2", our standard is 13 5/8" and is suitable for most people.

EXTRAS: Scope & rings/bases _____
